

✓ Introduction and purpose

Surplus material is a challenge for operators and suppliers. It takes up storage space and can be expensive to scrap or recycle. Loop helps companies sell surplus material to other industry players and facilitate its reuse, thereby reducing costs and environmental impacts.

✓ Benefits

Loop helps operators and suppliers handle excess surplus materials in development, modifications and decommissioning projects, by:

- Reducing company's environmental footprints
- Reducing excess inventory
- Reducing scrapping costs
- Providing a dedicated point of contact for sales and transfer of materials
- Full traceability and control across operators, brokers, and buyers
- Encouraging sustainable industry competitiveness and practices
- No cure, no pay

→ If you need any additional information or would like to join Loop as a broker, please contact: support@virtualinventory.no
