

Manufacturer (Brand) Access

Depending on the demonstrated relation to a manufacturer (brand), users can add and/or view its associated content in EqHub.

Typically, users from Operator, Contractor, and Package Supplier companies will have full access to all non-restricted manufacturer information provisioned into EqHub. Whereas users from Supplier companies will require one of the following permissions in order to view any given Manufacturer's (brand's) information:

- 1. **"Read"**: Any non-restricted content for any given Manufacturer (brand) can be viewed.
- 2. **"Edit"**: Any content can be registered on behalf of the owner company, if any.
- 3. **"Edit&Share"**: Any content can be registered on behalf of the owner company, if any. This access also allows Supplier company to share "Read" and/or "Edit" privileges to other Supplier companies.

Data Access Management in EqHub

Document Access

Each document in EqHub is defined with an owner company. Depending on the defined owner’s decision, the document may be “*Restricted*”, meaning that only those companies defined as having access in a so-called whitelist for the particular document or manufacturer (brand) will be able to access the document.

Access can be requested in EqHub, and such request will be handled by the document’s owner and/or Custodian.

Access types:

- Owner

a company defined as owner for the manufacturer (brand). Has the privilege “*Edit & Share*” for the document’s manufacturer (brand);
- Edit

a company that typically provides a service on behalf of the Owner company or represents the owner’s manufacturer (brand) in a different capacity. Has the privilege “*Edit*” to the document’s manufacturer (brand);
- Read

a company that has read-only access to the document’s manufacturer (brand). Has the privilege “*Read*” to the document’s manufacturer (brand);
- Custodian

a company that can manage manufacturers (brands) and access to restricted documents.

What is a Custodian?

Offshore Norge facilitates overall data governance in EqHub and is a “*Custodian*” of all information in EqHub. For data and documents without active ownership, the Custodian will be able to manage a document or manufacturer’s (brand’s) whitelist based on adequate justifications and/or demonstrated needs.

Revision: 1

This document is restricted, which means that only whitelisted companies have access to this document. You can request access by pressing [Request access] button. The request will be sent to Owner company. If there is no Owner company, the request will be sent to Custodian company which temporary manage the document's whitelist. If there is no Owner neither Custodian, then you can contact the Support team
